

OBJECTIVE

As a dedicated Data Analyst and Developer with a Bachelor's degree in Applied Informatics, I bring a unique blend of technical expertise and analytical prowess to solve complex business challenges. With a strong foundation in data analysis, software development, and programming, I excel at transforming raw data into actionable insights that drive decision-making and operational efficiency.

My experience spans across analyzing large datasets, building custom data pipelines, and automating reporting processes to streamline business workflows. I am proficient in a range of analytical tools, including Python, SQL, and Excel, as well as development frameworks that allow me to design and implement scalable solutions. By bridging the gap between data analysis and development, I can not only interpret critical data trends but also create robust applications to support data-driven decision-making.

My strong problem-solving skills, combined with a deep understanding of database management, statistical analysis, and programming, make me a versatile asset in any team. I thrive in collaborative environments, where I can leverage both my technical and analytical expertise to optimize processes and contribute to innovative solutions. Passionate about using data to unlock growth opportunities, I am ready to drive impactful results and help organizations succeed in today's data-driven landscape.

SKILLS

- Data Analyst
- Python programmer
- Java Programmer
- Excel VBA
- Tax Reporting

LANGUAGES

- french | Native
- Englisch | Advanced.
Yes i get a B2 certificate
- Deutsch | Native.
Yes i get a C1 certificate and i live in Germany since 10 years.

SPEZIALIST TAX REPORTING

Stephane Verges Atontsa Kenfack

EXPERIENCE

SPEZIALIST TAX REPORTING JAN 2023 - PRESENT
HSBC . DÜSSELDORF .

A Specialist in Tax Reporting with a Data Analyst background plays a crucial role in managing and analyzing financial data to ensure accurate tax reporting and compliance with regulations. They gather, clean, and analyze large sets of financial data, identifying patterns and discrepancies that may affect tax filings. By using their data analytics skills, they create detailed reports, ensuring that tax calculations, forecasts, and filings are accurate and aligned with local and international tax laws.

They also collaborate with tax teams to streamline processes by automating data collection and reporting tasks, helping reduce errors and improving efficiency. Their ability to interpret data and provide insights supports decision-making in tax planning, risk management, and compliance strategies. Additionally, they stay updated on changing tax regulations, ensuring that the organization remains compliant. In summary, they combine tax knowledge with data analytics to enhance tax reporting accuracy and optimize tax-related processes.

BUSINESS DATA OPERATION APR 2021 - JAN 2023
HSBC . DÜSSELDORF .

A Business Data Operations Specialist with a Data Analyst background focuses on optimizing data-driven processes to support business operations. They are responsible for managing, analyzing, and maintaining the integrity of large datasets critical to operational decision-making. By leveraging their data analytics skills, they extract insights from data, identify trends, and improve the efficiency of business workflows.

Their role involves ensuring that data flows smoothly across departments, automating reporting processes, and optimizing data pipelines. They collaborate with various teams, including finance, marketing, and operations, to provide actionable insights that drive performance improvements. They also ensure data accuracy and compliance with company standards, troubleshooting any data discrepancies.

This specialist is integral to process automation, data reporting, and operational efficiency, helping businesses make informed decisions quickly. Their background in data analysis enables them to interpret complex datasets, improve data quality, and enhance overall business operations.

EDUCATION

BACHELOR OF SCIENCE APPLIED INFORMATIK APR 2015 - AUG 2020
UNIVERSITY DUISBURG-ESSEN . ESSEN .

CERTIFICATIONS & COURSES

I love working on Data and with that motivation i acquire 2 SAP certificates:

Certification in controlled processes with SAP ERP
. Case study solved in a live SAP system

- Certification in implementation with ABAP
. Case study solved in a live SAP system
